At PGI, we understand that there are many options for consumers. We strive to offer the best product on the market and make a PGI table the best choice for consumers. Our philosophy is based on these foundations:

Custom Text
And Graphics

Custom
Cabinet & Legs:
Veneer / Stains

Custom Sizes
Custom Pedestal
Tempered Glass:
Opens / Closes

Coffee / Pub Table
Custom Veneers / Laminates
Tempered Glass Top
Telescoping Rods

We Make Your Table, Not Ours

We offer customization options on nearly all of our tables that allow customers to ultimately build the table that best meets their needs. We offer customization as options for stain, laminate color, distressing, table top options, leg options, tempered glass, LED lighting...etc.

Our on-site CNC router allows us to customize tables in a way that few competitors can match, and we are the only manufacturer to have interchangeable standard/telescoping rods on all 1" cabinets.

We Build to Last, We Build to Match

Our products use high-quality material, parts, and components to ensure longevity, and we back our products with the longest warranty in the industry.

We're confident that you'll enjoy your PGI product for many years, and we'll be there to support you along with way.

Nearly every table purchased from PGI can be matched with other products from our product line to build a cohesive entertainment space. Our matching models of foosball and air hockey tables make a great pairing for any game room. In addition, many of our tables are already retro-styled to match your existing components.

We Innovate

We're continuously developing new products, options, and accessories for our tables to reflect the customer's changing needs.

Most recently, we've pioneered products like the Tradewind 234 air hockey table that can be used with 2, 3, or 4 players. The Tradewind 234 has an optional table top. Plus, we offer legs that can be set at air hockey height or pub table height.

We're incorporating LED lighting and Bluetooth speaker technology to make our games a multi-media experience.

Exclusively from PGI, nearly all of our foosball tables now allow for standard or telescoping rods. As technology and game play evolve, PGI's product options will continue to evolve.
